

Aim

To Find out what seeds need to grow.

Equipment

Plastic trays

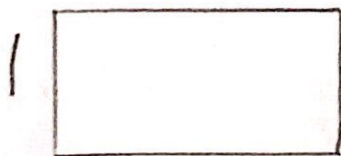

Cress seeds

Kitchen paper

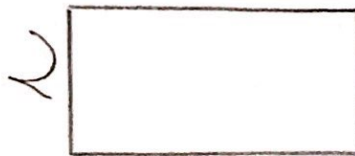

Water

Method

- Line 3 trays with paper
- Sprinkle on seeds
- make 2 wet

dry and dark

wet and dark

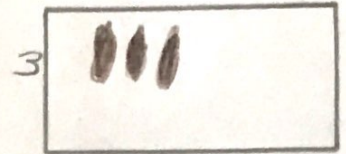

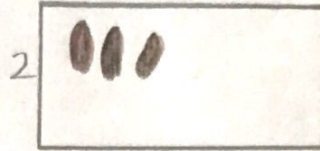

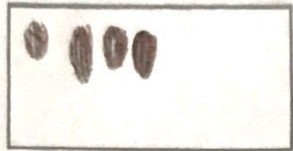

wet and light

Prediction

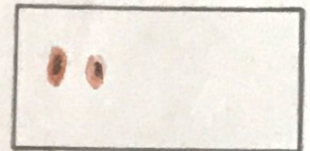

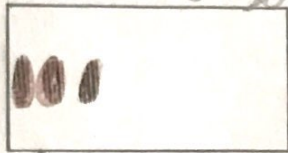

Land 2 will not grow.
3 will grow.

Day 1.

All the same

Day 2

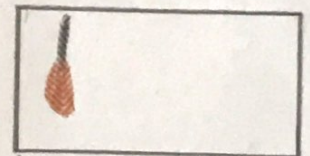

No change

tiny roots

light brown

Day 3

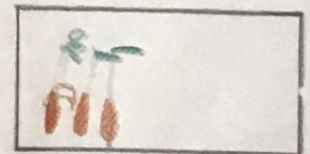

No change

More roots

very long

Day 4

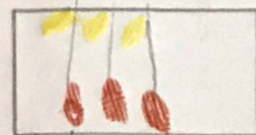

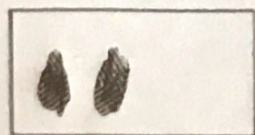

No change.

Small white stems, yellow buds

Green stems and leaves

Day 5

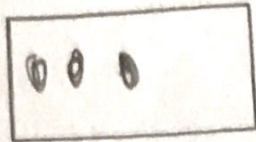

No change

thick yellow leaves

Not so tall
Green leaves
Lean to light

Day 7

No change

died

Healthy
Plants

Conclusion

My prediction was incorrect.

1. Did not grow.
2. Grew at first then died.
3. Grew strong.

Cress seeds need light and water to grow well.
